

**EXPRESSION OF INTEREST FOR STRUCTURAL DESIGNING
OF HIGH RISE RESIDENTIAL AND COMMERCIAL TOWERS
WITH PRE-CAST RCC TECHNOLOGY**

Jaypee Group is a well diversified infrastructure conglomerate with business interests in Engineering & Construction, Cement, Power, Hospitality, Real Estate & Education.

Jaypee Greens is the Real Estate arm of the Group and since its inception in the year 2000, has been creating lifestyle experiences from building Golf-Centric premium residences to building a self sustained Mega City.

Jaypee Greens Noida, spread over 1162 acres, is India's largest integrated Township offering world class facilities which blend with the golf course, virtually drawing us close to nature.

Our latest venture Jaypee Greens Sports City, spread over 2500 acres, is a perfect blend of sports facilities like a motor racing track, cricket stadium and other amenities like commercial zone, educational facilities, medical facilities and numerous recreational options which again make it a self-sustained Mega City. The total built-up area would be 20 million sq. mtr.

We are planning to introduce Pre-cast technology in our upcoming residential and commercial projects, for which we need experienced Indian and foreign consultants having exposure in analyzing & designing high rise Pre-cast buildings and related façade components in active seismic conditions and can address ductile requirements as per Indian Standards and codes particularly in National Capital Region.

We invite Expression of Interest (EOI) from experienced consultants having experience in designing of Pre-cast high rise residential and commercial buildings in active (Zone-4) seismic conditions. Interested parties may send their EOI with detailed profile including part & pre-cast assignments within 15 days by post or email to:-
